verse 1

```
          C#m          A          E      B
Guess my suspicions all on you were right
          C#m          A          E      B
You brought the hurricane into my life
          C#m          A
Here s the truth, you wanted know
          E          B
How it feels on your own
          C#m          A          E      B
Just blurry images of us in mind
          A          E
I used to cry, I used to worry
          C#m          B
But now you say you re so damn sorry
          C#m          E          B
How could you be kind but still so cruel?
```

```
          C#m          A          E      B
Don t say that this is what it feels like
          C#m          A          E      B
You ve got my heart under a headlight
          C#m          A
And though my mind is always changing
          E          B
Won t you give my heart a break?
          C#m          A          E      B
Try to fix the broken pieces once again
          C#m          A          E
```
