

## Devotion

Ellie Goulding

[Verse 1]

**Am**                    **C**            **F**  
Open up and let me in  
**Am**                    **C**            **F**  
Show the bruises on your skin  
**Dm**                    **G**  
Let the fires all burn out  
**C**                    **F**  
I can hear the silent shout in you  
**Am**                    **C**            **F**  
Let it go don t be so scared  
**Am**                    **C**            **F**  
Find the love you lost again  
**Dm**                    **G**  
Let the chaos disappear  
**C**                    **F**  
Don t you know I m always here for you?

[Chorus]

**C**  
Cause this is devotion, I am lost  
                         **G**            **Am**  
You re the only one I see  
                         **F**            **C**  
Our bodies in motion, I am caught  
                         **G**            **Am**  
Floating in your gravity  
                         **F**            **C**  
Whenever you break, I ll fix it for you  
                         **G**                            **Am**  
I m the one who drives to you at night  
                         **F**                            **C**  
And maybe we ll fall a little deeper  
                         **G**                            **Am**  
I think our little hearts will be alright  
  
Cause this is devotion
