

Safe

Emery

[Verse 1]

**Bm** **D**  
You could always see yourself in me  
**Bm** **D**  
A brand new way to live vicariously  
**Bm** **D**  
I wanted to show you the world through my eyes  
**Bm** **D**  
But you had to let me go, just let me go so I could live my life

[Chorus]

**G** **A**  
We used to look at the stars, and dream of the days we would find something more  
**G** **A**  
Somewhere along the way, the smile left your face and life set in  
**A**  
It changed everything  
**G** **A**  
We used to look at the stars, and dream of the days we would find something more  
**G** **A**  
Somewhere along the way the smile left your face, as your eyes fell  
**A**  
The light that once shined slowly dimmed

**Bm D Bm D**

[Verse 2]

**Bm** **D**  
I wandered from the path that you chose for me  
  
(I said I d never let you go, but I had to)  
**Bm** **D**  
I felt your hand slip away, as my eyes opened to see  
  
(I didn't want to paralyze the thoughts in your head)  
**Bm**  
All the beauty in the pleasure  
  
(Search for what you ve wanted)  
**D**  
And all the things that I had missed  
  
(don t let it slip from your hands)  
**Bm** **D**  
In a moment I was caught up in the world  
  
(With everything that she offered me)

[Chorus]

**G** **A**  
We used to look at the stars, and dream of the days we would find something more  
**G** **A**  
Somewhere along the way, the smile left your face as your eyes fell  
**A**  
It changed everything  
**G** **A**  
You held me close in your arms, promised me you'd love me no matter what I would  
become  
**G** **A**  
It's your grace I feel everywhere pushing me into the unknown that I fear

[Bridge]

**D** **F#m** **G**  
You played it safe so the ones you loved could have everything  
**Bm** **A**  
You gave yourself when there was nothing left  
**D** **F#m** **G**  
Even when the sky was falling down you covered me instead  
**Bm** **A**  
You gave yourself when there was nothing left

**Bm D**

[Outro]

**Bm** **D**  
You could always see yourself in me
