

Wide Awake

Emi Fujita

My first tab! I played this on the ukulele so I m not too sure if it will sound good on a guitar..

Am Dm G C
The dawn breaks slowly in the east

Am Dm G
as day defeats the night

Am Dm G C
The echo of your voice that greets

F Dm G
The feeble morning light

C G Am G
Is the only answer to my silent prayer

Dm G
And the promises I never make

C G Am F
You are always with me you re always there

Dm G Am
In my dreams though I am wide awake

(same chord progression for the next two verses of the song)

And sometimes a forbidden glance
Will give my heart away
The light that kindled our romance
May flicker through the gray
All the gold and silver at the rainbow s end
All earthly goods I will forsake
For each shooting star - a wish I send
And I dream - though I am wide awake

You were the rolling tidal wave
That swept my barren shores
If you will let me share your day
My life s forever yours
I will never understand the reason why
We fail to learn from our mistakes
I will wait for you as the days go by

With my dream though I am wide awake
