   For fear of a mistake

F   **C**
   One path leads to paradise
F   **C**

```
There were turns, I did not take
                  F                             C
There were mysteries, I could not unravel

[Verse 3]
C
   So I m standing at the crossroads
F                            C
   Imprisoned by this doubt
C
   As if by doing nothing
F                            C
   I might find my way out

[Chorus 1]
F                              C
   One path leads to paradise
F                              C
   One path leads to pain
F                                C
   One path leads to freedom
Dm                            C
   But they all look the same

[Chorus 3]
              F                C
There were roads, I never travelled
                F                  C
There were turns, I did not take
                 F                             C
There were mysteries, I could not unravel
     Dm                          C
But leaving you was my only mistake

[Outro]
              F                                  C
There were roads,                   I never travelled
               (There were roads)
              F                               C
There were turns,                 I did not take
               (There were turns)
              F                          C
They were mysteries, I could not unravel
     Dm                          C
But leaving you was my only mistake
