

**Smoke A Little Smoke**  
**Eric Church**

Capo 1

**A**

Turn the quiet up, turn the noise down

**A**

Let this ol' world just spin around

**A**

I wanna feel it swing, wanna feel it sway

**E**

**D**

And put some feel good in my soul

**D**

**E**

**A**

Drink a little drink, smoke a little smoke

Want a little more right, and a little less left

Little more right now, a little less what's next

Act like tomorrow's ten years away

And just kick back and let the feelin' flow

Drink a little drink, smoke a little smoke

Bridge:

**C#m**

**D**

I set my sails for a new direction

**A**

But the wind got in my way

**C#m**

**D**

I changed my course but my definition of change

**E**

Just ain't the same

I'm gonna sit right here stay away from there

I'm gonna make pretend I just don't care

And I could get up, go get her back

Or maybe I'll just let her go

Drink a little drink, smoke a little smoke

**D**

**A**

Drink a little drink, smoke a little smoke

**D**

Drink a little drink, smoke a little smoke

**A**

Kick back, gives the blues a spin, break out the wine, forget again

**D**

Dig down deep, find my stash. light it up, take me back

**A**

Kick back, gives the blues a spin, break out the wine, forget again

**D**

Dig down deep, find my stash. light it up, memory crash

**A**

Oh no, I donâ€™t know, baby, it might take, all night

**E**

**D**

Then Iâ€™ll maybe break out that old rock and roll

**A**

**E**

**A**

Drink a little drink, smoke a little smoke
