**If The Ocean Was Whiskey**
**Eric Dodd**

Whole song is basically the same.

**D G D**
**D A D**

(**D**)                                        (**G**)        (**D**)
If the ocean was whiskey and the sand was cocaine
(**D**)                        (**A**)        (**D**)
I d be in Mexico feeling no pain

That s the rhythm to an extent. Just match that chord pattern to the rest of the
song
including the chorus and bridge. Apparently all tabs have to be at least 300
characters
long so I guess I ll just keep typing because I already explained the whole song
cause
it s really simple. Dadadadadadadadada wasting characters away...
