

You And I Tonight
Faber Drive

G C
Tonight, a candle lights the room
G C
Tonight, its only me and you
E
Your skin like gravity
D
Is pulling every part of me
G C
I fall, you and I collide

G
And what if I stay forever
D
What if there s no goodbye
E C
Frozen for a moment here in time, yeah
G
If you tell me the sky is falling
D
We ll see that the stars collide
E
The only thing that matters in my life
C
Is you and i tonight

G C
Our eyes close, the candle burns away
G C
But I know the fire still remains
E
This love is all we need
D
We fit together perfectly
G C
I fall, you and I collide

G
and what if I stay forever
D
What if there s no goodbye
E C
Frozen for a moment here in time, yeah
G
If you tell me the sky is falling
D
I ll see that the stars collide

E

The only thing that matters in my life

C

Is you and I tonight

I wanna see this through

I m gonna give it all to you
