```
Iron Lion
Fairport Convention
[Intro]
[Verse]
Now I ve been an engine driver all of my days
That s the only thing I can do
I hold a good head of steam everywhere that I m seen
Wherever my wheels rolled through
Wherever my wheels rolled through
[Verse]
Well, I was nearly shut down in a Midwest town
Her hair was red, her eyes were blue
But the wheels on the track kept calling me back
So, I bid that girl adieu
Yes, I bid that girl adieu
[Chorus]
Blow whistle, steel wheels keep on humming
Hold on darling, your engine driver s coming
He s coming through
[Verse]
Some day I ll have to give up the iron lion
And then I ll know just what I will find
I ll find me some shack by some old railroad track
So I can hear them motors whine
                                 D
```

So I can hear them motors whine

```
[Chorus]
Blow whistle, hear them steel rails a-humming
Hold on darling, your engineer is coming
He s coming through
[Verse]
Now I ve been an engine driver all of my days
That s the only thing I can do
I hold a good head of steam anywhere that I \ensuremath{\mathrm{m}} seen
Anywhere my trains rolled through
                                     D
Anywhere my trains rolled through
[Chorus]
Blow whistle, hear that steel rail a-humming
Hold on girl, your engine driver s a-coming
Coming to you
[Outro]
