

**Sleepless Night**

I saw that nobody had done this yet, so I decided to give it a try. Bear with me, I'm new to this.

Piano interlude

Repeat Chorus

After that there s a little e faint e guitar solo, the piano just says with the

A G A G

until the fade.

Notes: I m not quite sure about that first D in the bridge, comments would be appreciated

If you want, go ahead and play around with your B string while you re hitting the A on the chorus. Ortega does the equivalent of releasing that string on the piano for a little while, then he picks it up again.

God bless!
