Verse 2:

I leave home at seven
Under a heavy sky, I ride my bike up, I ride my bike down

November smoke and your toes go numb
A new colour on the globe
It goes from white to red a little voice in my head says oh oh oh

Chorus, slightly different lyrics (2x):

I know it, I think I know it from a heaven
They ve said so, it doesn t need more explanation
A box to open up with light and sound
And if you don t
You re on your own

I know it, I think I know it from a heaven
They ve said so, it doesn t need more explanation

A box to open up with light and sound
Making you cold
Very cold
