FireFlight-Brand New Day

Drop C#(d#A#F#C#G#C#) Half step down with the D# dropped to C#

It s tabbed out as if it was tuned to Drop D, so just play these chords in drop C#

tuning but act as if you are in Drop D. Simple, and makes it easier to change the key.

I made this tab awhile ago, and its mainly for the purpose of playing it in a worship setting, just the basic chords to play the song. If there are any mistakes let me know and I ll fix them.
