Sweet Nothing
Florence And The Machine

```
E            B             G#m            F#
You took my heart and you held it in your mouth
E            B             G#m           F#
And, with a word all my love came rushing out
E            B             G#m               F#
And, every whisper, it s the worst, emptied out by a single word
E         B         G#m    F#
There is a hollow in me now
```

```
E                    B
So I put my faith in something unknown
G#m             F#
I m living on such sweet nothing
E                     B
But I m trying to hope with nothing to hold
G#m              F#
I m living on such sweet nothing
E
And it s hard to learn
B
And it s hard to love
G#m                      F#
When you re giving me such sweet nothing
E              B
Sweet nothing, sweet nothing
G#m             F#
You re giving me such sweet nothing
```

```
( E    B    G#m    F# )
```

```
E         B         G#m            F#
It isn t easy for me to let it go
   E
Cause
        B         G#m          F#
I ve swallowed every single word
  E
And
       B              G#m
Every whisper, every sigh
     F#                    E
Eats away at this heart of mine
              B         G#m      F#
And there is a hollow in me now
```

```
E                    B
So I put my faith in something unknown
```

```
G#m                    F#
I m living on such sweet nothing
E                        B
But I m trying to hope with nothing to hold
G#m              F#
I m living on such sweet nothing
E
And it s hard to learn
B
And it s hard to love
G#m                      F#
When you re giving me such sweet nothing
E              B
Sweet nothing, sweet nothing
G#m              F#
You re giving me such sweet nothing

(  E    B    G#m    F#  )

E                    B
And it s not enough
    G#m                 F#
To tell me that you care
E               B         G#m              F#
When, we both know the words are empty air
                     E    B    G#m    F#
You give me nothi-------------ng
E    B    G#m    F#
Nothi---------ng
```
