

Break Your Knees Flyleaf

Okay so, this is my first time making a tab. I really love this song, it s actually my favorite by flyleaf, and I realized no one else had a tab for this yet. Sooo, playing around with my guitar, I found chords that hopefully might be the right ones. All I know is they re good enough to play with when I m singing it, so. Hopefully this helps anyone else who wanted it for the same thing. :)
