RUSS LEWIS s TAB for SUPERCOLLIDER BY FOUNTAINS OF WAYNE

This is my first tab - didn't have the CD to hand to check the key, but these seem like the changes to me. Hope it's ok. Feel free to amend and or mess about with it as you please. Peace and love.

A

Shooting inside your mind

(Same chord sequence for the rest)

Gather round the gas tower

don't it kind of look like a bong

I heard it backwards

Hidden in a Pink Floyd song

Stella Radiata

It s got to set your mind at ease
Spinning on the tire swing
Flying like Tarzan through the trees

And back to the bus when the sun goes down
Try to aim it back into town
We re riding

Out of the blackness
Into the great big sky
Supercollider
Shooting inside your mind
And coriander grows along the banks where we go
walking at night
Creeping slowly over the ground
We tiptoe round the garden
Trying not to tramp it down

Stay low to the ground or they ll sniff you out
You nver know what you will find
When you go

Out of the blackness
Into the great big sky
Supercollider
Shooting inside your mind
