B* E B B* A B (2x)

*on this B Frank does a sliding thing in from an A barre chord.

and for the G#, it might be minor during the verses but it doesn t seem like it. it s almost as if it could swing both ways.

a little insiders info... or not, maybe everyone already knows this... This was a pixies b-side (an instrumental) and Frank originally wrote this song when he was about 15.
