The other tab on here helped me to work this out even though the mans ears must be
if he thinks his tab is anywhere close. Trust me this is a lot more accurate...
I haven t
to work out the other riff on this track (where the vocals come in). If you need
help,
basically replicates the guitar line so check out the guitar tab.

As I mentioned previously, I met Joe Lally recently after a show he played and
he has
renewed my interest in bassism. THANKS JOE!
