Harlequin
Genesis

[Verse 1]
```
Gm                   C
Came the night a mist dissolved the trees
Cm        G          A                        Am Eb G
And in the broken light colours fly, fading by
G             C
Pale and cold as figures fill the glade
Cm        G              A                       G C G
Grey is the web they spin, on and on, and on and on
G         Gm         Cm          Gm
Through the flame still summer lingers on
Gm                      Eb    A
Though her pictures soon shatter
```

[Chorus]
```
G    D
All, always the same
        Bm              D
But there appears in the shades of dawning
Em         G
Though your eyes are dim
N.C.               D
All of the pieces in the sky
```

[Verse 2]
```
Gm               C
There was once a harvest in this land
Cm        G          A                       Am Eb G
Reap from the turquoise sky, harlequin, harlequin
G                 C
Dancing round, three children fill the glade
Cm        G            A                            G C G
Theirs was the laughter in the winding stream, and in between
G      Gm      Cm         Gm
Close your door, the picture fades again
Gm                     Eb   A
From the flames in the firelight
```

[Chorus]
```
G    D
All, always the same
        Bm              D
But there appears in the shades of dawning
Em         G
Though your eyes are dim
N.C.                D
```

All of the pieces in the sky

G   **D**
All, all is not lost
            Bm   **D**
And light appears in the shades of dawning
Em   **G**
When your eyes can see
N.C.   **D**
Order the pieces, put them back, put them back
