

Beautiful Girl  
George Harrison

A                                    D-                    A                                    D-  
Never seen such a beautiful girl, got me shaking inside  
A                                    D-                                    E  
Calling on me from deep within her eyes  
A                                    D-                    A                                    D-  
Not the kind you go handing around, want to keep her right there  
A                                    D                                    E  
But this love it don t come as no surprise

Chorus:

D                                    E                                    A                                    E  
And when I saw the way that she smiled at me  
D                                    E                                    A                                    E  
I knew it there and then that she was a one  
D                                    E                                    A                                    E  
And then I felt the way she was touching me  
D                                    E                                    A                                    E  
Was something I had known I was waiting upon

Never seen such a beautiful girl, had me quickly untied  
Calling to me she made me realize  
Not the kind that is lost or is found, she has always been there  
A lover needed for this soul to survive

Chorus + verse 1
