Time Machine
Girls' Generation

[Verse]
```
               Bm
I m waken up
Without you here
        G
It s sinking in so loud and clear
    D                      A
Its over, guess its over
          Bm
Wish I could take it back
and fight again
     G
I can t rewind,
Undo what s done
        D
It s no redemption for me
          A
Never written out this story
 Bm                    G
One mistake, got one regret
     D                              A
A memory, I know you can t forget
          Bm
I m a prisoner
                   G
And there s no way out
                 D
Cause the future Past
                               A
I m stuck in the here and now
```

[Chorus]
```
              D
No time machine
                Am
Could ever bring us back
          Em
No apology
                 G
Is gonna get this on track
                 D
I could wait around
              Am
For a thousand years
    Em
But that will never change us
                           G
```

```
If I m gonna bring us back
                        D
I need a time machine
      Am                      Em
Oohhh,... I need a time machine,...
    G
Ooo,...

[Verse]
    Bm
I crossed the line
I broke the rule
      G
I hate myself,
For hurting you
        D
My conscience
Weighs so heavy
            A
Like a boulder since you left me
  Bm
Even though it kills me
I gotta let you go
        G
I m fallin to pieces
And you won t even know
        D
The pain inside
                    A
Of seeing me alive
  Bm                      G
One mistake, got one regret
      D                                       A
A memory, I know you can t forget

[Chorus]
                  D
No time machine
                            Am
Could ever bring us back
                Em
And no apology
                    G
Is gonna get this on track
                  D
I could wait around
                        Am
For a thousand years
  Em
But that will never
                                        G

Change us if I m gonna bring us back,...
```

[Bridge]
```
                         Em
I need a time machine
         Em                      Bm
The fastest there s ever been
                                    G
So I could get you back with me
Em              A              Bm
Rewind and long live the past
     G                             Em
Never wanted anything so bad
             G
How can I move on,
          Bm
cause now that
        G                              A
my future has become your past
```

[Chorus]
```
                  D
No time machine
                          Am
Could ever bring us back
                Em
And no apology
                    G
Is gonna get this on track
                  D
I could wait around
                      Am
For a thousand years
 Em
But that will never
                                    G
Change us if I m gonna bring us back,...
     D
If only I could change us
  Em                        G
If only I could bring us back
                      D
Gimme a time machine,...
 Am                      Em   G
oOo,.... Give me a time machine
                      D
Give me a time machine
```
