

**Philander**  
**Glen Hansard**

READ:

PLEASE READ the chords first since there are TWO DIFFERENT VARIATIONS of F chords that need to be used also continue reading for the playing technique.

I am also iffy about the F during the verses so if you think its something else please let me know and I will change it.

For the verses you can mute the chords and should only play the low strings of the chord, this is very apparent in the song if you listen. During the chorus the song is much livelier so you can start playing the chords loud, unmuted and play all strings. As for the rhythm just listen to the song, its really easy to pick up. LISTEN to the song in order to pick up chords timings etc since he drags out many of the words

If you have any questions or changes please let me know and please give credit if you reuse my tab. Thanks and Enjoy
