

**Carolina Rose**  
**Gloriana**

Great song. On youtube he plays it with a Capo on 2 and it seems like some alternate tuning. So this is the way i found out how to play it with standard tuning. This is NO CAPO, but it can be played with capo on 1. in that case Bb would turn to A, F would turn to E and B\* would turn to B and C would turn to -. Also the B\* is B one fret up
