Trochus Boats
Gordon Bok
[Intro]
E D E
[Verse]
                Α
I am living dry and placid now, among encircling mountains
                 D A
                               В
An old man still remembering the days that used to be
                                                          C#m
But I close my eyes and live again, those days of sweat and laughter
When we worked the trochus luggers in the western Coral Sea
[Verse]
Sailing in a black hulled lugger with a lookout at the masthead
             Α
                      D A
                                     В
You may drift along the coral cays and anchor where you please
                                   F#m
In the glassy leeside waters of some rocky offshore island
Though the outer reef be trembling under pounding whitened seas
[Chorus]
Laddie oh..., Laddie ay...
Laddie oh..., Laddie ay...
Laddie oh..., Laddie ay...
                          E
Laddie oh..., Laddie ay...
[Verse]
            D
                   Α
                                    Е
You may anchor calm and safely in the shallows over coral
         D
                       D
                              Α
                                    В
                Α
Where the waters glimmer peacock in a hundred shifting shades
                                        F#m
You can hear the rippling wavelets tinkle gently on the beaches
And the stays and braces thrumming in the southeast trades
[Chorus]
Laddie oh..., Laddie ay...
