

Hallelujah Money  
Gorillaz

Intro: **Fm**

Verse

**D**                    **Em**    **D**  
Here is our tree

**D**                                    **Em**    **D**  
That primitively grows

**D**                                    **Em**                    **D**    **F#m**                    **Em**  
And when you go to bed, Scarecrows            from the far east

**D#m**            **Em**  
Come to eat

**G**            **Em**  
Its tender fruits

**D**                    **A**  
And I thought the best way to perfect our tree

**D**                                    **Em**    **D**  
Is by building walls

**D**                                    **Em**    **D**  
Walls like unicorns

**D**                                    **G**            **D**  
In full glory

**F#m**    **G#m**  
And galore

**D#m**            **Em**  
And even stronger

**Em**  
Than the walls of Jericho

**A**  
But glad then my friend

**Em**                    **A**  
Out in the field we shall reap a better day

**D**                                    **Em**                    **D**                    **D**  
What we have always dreamt of having

**Em**                    **D**  
Are now for the starving

**D**                                    **Em**                    **D**    **F#m**                    **G#m**    **D#m**  
It is love,            that is the root of all evil

**Em**  
But not our tree

**G**                    **A**  
And thank you my friend

For trusting me

**D** **Em** **D**

(a cappella)

Don t worry, my friend  
If this be the end, then so shall it be  
Until we say so, nothing will move  
Ah, don t worry  
It s not against our morals  
It s legal tender  
Touch, my friend  
While the whole world  
And whole beasts of nations desire  
Power
