Stylo
Gorillaz

So yeah, this is the riff that s basically played most the way through:

```
G-----------------------------1--0-----------|
D-------------------------------3--1------|
A-1--3-3----1--3-3----1--3-3------------------|
E--------------------------------------------|
```

OR because you can hear a delay on the bass, I personally like to play the last
4 notes
twice like this (sounds cooler :P)...
```
G----------------------------1-1-0-0-----------|
D------------------------------------3-3-1-1----|
A-1--3-3----1--3-3----1--3-3--------------------|
E---------------------------------------------|
```

Then you get a key change when they start to sing Overload, overload...
```
G-----------------------------1--0-----------|
D-1--3-3----1--3-3----1--3-3----------3--1------|
A--------------------------------------------|
E--------------------------------------------|
```
