## Conceal Graduating Life B: X24222 D: XX0230 [Intro] **A E B D** x2 [Verse 1] You re always locked away In your room you ll stay Indecisive about the future How your dreams have gone off to play Stuck in a loop As your birthdays pass One day you ll wake up with a box full of junk To remember the life you had [Chorus] Get a break some time You ll never be happy if the sun don t shine В But it always shines where I live (wo-ooo-oah) So I let down the shades D The big black curtains keep the light away (light away) I wanna feel better but not today [Bridge] And everything is meaningless in some regard I haven t found any so far

I ve just been scrabblin in the dirt to keep from crashing

```
I will push through the pain
Reach into the fire
Take experience to heart
And let the rest transpire
Just wake up each day to live
Just wake up each day to live
[Chorus]
         Е
Get a break some time
You ll never be happy if the sun don t shine
                           В
 But it always shines where I live
 So I let down the shades
                                D
The big black curtains keep the light away (light away)
 I wanna feel better but not today
```
