Intro: **F# Ebm C# B**

F#   **Ebm**
So it didn t go to plan
                      C#
It s hard to understand
                          B
But now I know this is just our story
F#   **Ebm**
I will set out on my way
                        C#
You re never in one place
                        B
And now I can learn to walk before we,

G#m   **Ebm**
Run away to the sin,
          C#
It s just me
          C#
It s just you
                F#
One day at a time

                      Ebm
When nothing s for sure
                          C#
We can throw the past away now
                        B
Cause we don t need it anymore
                F#
One day at a time
                  Ebm   **C#**
Cause I still believe that it s ours for the taking
                      B
I know that we can make it one day
        F#
At a time

Ebm C# B

F#   **Ebm**
Yeah, we hear it from our friends
                      C#
They tell us how this ends
                          B
But they don t know this is not their story

```
F#                              Ebm
I know we will find a way
                    C#
We re gonna be okay

Cause I m here
            B
You don t need to worry

G#m                     Ebm
Now all we should be
        C#          C#
Is just you and me
                F#
One day at a time

                    Ebm
When nothings for sure
                        C#
We can throw the past away
                            B
Cause we don t need it anymore
                F#
One day at a time
                Ebm                         C#
Cause I still believe that it s ours for the taking
                        B
And I know that we can make it
                        Ebm
One day, One day at a time

                        C#
We ll flee the memories like the dark, the in between
F#                  B
I want everything
        Ebm
And love I know will carry us
        C#
With you I ll always have enough
F#                          B
We ll work together through this life
                F#
One day at a time

We ve got the rest of our lives
              Ebm                           C#
and I still believe that it s ours for the taking
