London By Night Greg Laswell

London By Night Written by Carrol Coates Performed by Greq Laswell (and more notably Frank Sinatra) This is my first tab, really love this song and there weren t chords for it online so I figured them out as best as I could. The picking and strumming pattern that Laswell does on this song is excellent so be sure to listen to it first. Please tell if there s something you think could be changed to sound more like Laswell cover of the song. G D7 London by night is a wonderful sight BmThere is magic abroad in the air G I m often told that the streets turn into gold D When the moon shines on Circus and Square Deep in the dark that envelops the park BmDm There s romance in each cigarette glow Down by the Thames, lights that sparkle like gems D Seem to wink at each girl and her beau Up comes the moon when the city s asleep BmHe s not alone, for it seems Somewhere up there stands an angel to keep Her watch while each Londoner dreams G My love and I saw the sun leave the sky BmThen we kissed in the fast-fading light G Most people say they love London by day
