London By Night

Written by Carrol Coates

Performed by Greg Laswell (and more notably Frank Sinatra)

This is my first tab, really love this song and there weren t chords for it online so I figured them out as best as I could. The picking and strumming pattern that

Laswell does on this song is excellent so be sure to listen to it first. Please tell if there s something you think could be changed to sound more like Laswell s cover of the song.

London by night is a wonderful sight

I m often told that the streets turn into gold
 Bb **C** **F**
When the moon shines on Circus and Square

F **Bb** **F** **C7**
Deep in the dark that envelops the park

There s romance in each cigarette glow

Down by the Thames, lights that sparkle like gems

Seem to wink at each girl and her beau

Up comes the moon when the city s asleep

Somewhere up there stands an angel to keep

Her watch while each Londoner dreams

My love and I saw the sun leave the sky

Then we kissed in the fast-fading light
