Outro Chords: **Bsus** --- **B** (9x)

I play piano, so I'm not sure if there's any way to play some of these chords on a single guitar. To achieve the sound of the song, maybe you could have a bass player play the bottom note of that chord. (Ex: for Eb/Em, the bass player would play the Eb and the guitarist would proceed to play the Em chord.) Have fun! Also I was having trouble with the finished tab thing putting the chords over the right words, but hopefully you guys can figure it out.
