Am

```
Spaceman
Haddaway
[Intro]
[Verse]
Know this man hanging out in space, living together with a man in space
Somebody told me, somebody told me
Venus shines every day and night, living with her just feels right
Somebody told me, somebody told me
[Pre-chorus]
     Am
Cuz living out here is not so bad
The ladies I know always turn me in circles
Turn me in circles
[Chorus]
Spaceman, touchdown, come around
What you do, and what you found out there
There s somebody out there
Spaceman, touchdown, come around
                                 Am
What you do, and what you found out there
There s somebody out there
[Verse]
Titan s now giving us new light, the voice from Earth, looking for life
Somebody told me, somebody told me
Pluto s flying alone out there, little by little, man wants to care
Somebody told me, somebody told me
[Pre-chorus]
```

```
Cuz living out here is not so bad
The ladies I know always turn me in circles
Turn me in circles
[Chorus]
Spaceman, touchdown, come around
                                 Am
What you do, and what you found out there
There s somebody out there
Spaceman, touchdown, come around
What you do, and what you found out there
                              Am
There s somebody out there
[Bridge]
Are you gonna wait for me
Tonight
Mars will give us light to see
So bright
Guide me to the clouds
The Earth
The Moon
    Am
The sea
To you no-o-o-o-ow
[Chorus]
Spaceman, touchdown, come around
What you do, and what you found out there
There s somebody out there (What you find out)
Spaceman, touchdown, come around
What you do, and what you found out there
There s somebody out there (What you find out)
```
