The chemistry?

Don't let her waste her time.

Just tell her if she's on your mind.

Tell her things she's been waiting for,
Dreams you were holding in,
The truth that has never been said.

Tell her why you were holding back
And all that there was to fear---
Nothing. Cause she felt the same.
Tell her everything right here.

Chasing someone isn't worth it
When they can't even meet you halfway.
She's been telling herself this a thousand times
Every time
She sees you
And your smile

Don't let her waste her time.
Just tell her if she's on your mind.

Tell her things she's been waiting for,
Dreams you were holding in,
The truth that has never been said.

Tell her why you were holding back
And all that there was to fear---
Nothing. Cause she felt the same.
Tell her everything right here.

(Strum each chord once and slow down tempo)
Don't you see
The way she smiled at you when you came her way.
