

Trees Lounge

Hayden

this is from the live version at convocation hall, so...

The intro part is just G, D,
but you play the D like this 44302x, get that? it s just a full C up two
frets...

any way you do the G, D for awhile then it goes

C# (i mute the G and B strings) then the D again,

C#	D
sit here in tree s	lounge
put it in my mouth...	

then it goes to a D like this x0023x

D Cause i need something to forget **A**

what got me in this mess

feelin less and less

and that's the whole tune i'm sure you cvan figure the rest out yourself!
