[Intro] G Bm Bm/C

```

G                Bm                Bm/C
The memories of us will fade away
G                Bm                Bm/C
Falling deep like rocks in water
G                Bm                Bm/C
Like a drain our pain will rain again
G                Bm                Bm/C
Pictures blown like scissor paper cuts

```

```

A                Bm                G
As we move on into the darkness
A                Bm                G                D
Forever dreams will touch your hands
A                Bm                G
Heading for the brand new circus
A                Bm                G                D
They call your name they want you back

```
