This isnâ€™t the best tab but I guess it works. But when they play this song
they play it

in C# so if you want you can play those they sound pretty good these chords are just
easier to play and I think they sound really good. If you have any questions just email
me my email is christianfrancelesquivel@gmail.com id be glad to answer any questions you have
cause I figured it out by ear and the rhythms a little weird sometimes.
