Fool For You
Heather Nova

Verse

```
C                                             G
You came into my life I don t think that you meant to

Am                                 G
You were standing in a doorway I was trying to walk through

C                                           G
Like an angel or the devil I could never quite say

Am                 G
It doesn t matter anyway
```

Chorus

```
C           G
Cos oh I m a fool for you

Am                G
I m a fool for you

C                         G
Open my heart and let the wind blow through

Am                  G
Cos I m a fool for you
```

Verse

```
C                                   G
You can tell me anything and honey I ll believe

Am                                 G
Cos when you keep me hanging it only feeds the dream

C                                   G
I m never gonna reach you, you re a distant shore

Am                         G
But you still got me coming back for more
```

Chorus
