                        2008 â€" Hello Saferide
---------------------------------------------------------------------
```
Tabbed by: Patrik
Not sure that this is the right chords but it sounds ok when I play it.
Please see reference to chords at the bottom of the page

Verse:

```
I                               II              III             IV
There is a war in all the heads and there s a war in mine as well
          V                     IV                  I
And if I could explain it any better, I m sure I would
I                       II              III         IV
We re in a bus and it s night, you opened up and so will I
                V                       IV                      I
But though I m good with words, I ve never been good with words
```

Chorus (1):
```
G            C    D                      G           Em
But all I know is there s something new this year
         C                          D        G
All I know is there s something new real near
```

Verse:
```
I                               II          III             IV
There is a town that I live in and it s a town that favors winners
            V       IV                  I
And when I win I think about when I ll next lose
I                               II
I took a train that took me north
            III                         IV              V
And it s the place where trees speak louder than the people
        IV                      I
But if I have to pick that s what I ll choose
I                       VI        VII               IV
I walked along the river Ume, it chilled me out of my bones too
          V                     IV                  I
But a cold wind is always better than a cold voice
I                               II              III             IV
I am not strong enough for win city, so I ll stay in to play Sin
        V               IV                          I
Witty people without hearts have always had a lead on me
```

Chorus (2):
But all I know is there s something new this year
All I know is there s something new real near

```
All I know is there s something new this year
I don t know much, but there s something new coming near

Vers:
I                                   II            III                 IV
I ll walk into the shop where you work, it is a shop that kills you slowly
                  V                 IV                                    I
There ll be no blood but another shirt on a hanger will still behead you
I                                       VI          VII             IV
I ll lift your arm and you ll lift mine, and in a Communist state of mind
            V                     IV                          I
We re not worth more than anyone else but surely not worth less
