

Heart Beats

Hey Marseilles

G

We left winter behind

G

Shorter days and long nights

C Em G

Were all that was holding us back

C Em G

From people we knew we would find

G

Open air wears you thin

G

They say you ll love again

C Em G

But love s an equation to them

C Em G

Get out what it is you put in

C Em

I will look back

D

I will hold fast

C

To this

[Chorus]

G Em

Your heart beats

Em

For another day

D

I still believe

G Em

You love me

Em D

But in a different way

G Em

The night falls

Em

The city lay asleep

D

Among the crowds

G Em

We both know

Em D

You re my only dream

C

I m starting to see

G Em

Where we went wrong

C

The lives that we lead

G Em

Will weave on their own

C

You can t climb so high

G Em

And still see the ground

C

You re on your way up

G Em

I m on my way down

[String interlude]

C G Em x2

G

Looking back where we were

G

There s no way to be sure

C Em G

Things could have gone other ways

C Em G

But you d follow me to today

G

We ll take up separate lives

G

And in the space that divides

C Em G

A reach for the best of what was

C Em G

And leave all that wasn t behind

C Em

I will look back

D

I will hold fast

C

To this

[Chorus]
