Hey Rosetta!

Seeds

Hey Rosetta

Great first song of a great album, shame the chords haven't been posted yet!

Mandolin Riff:

```

E|:00000000000000000000000000000000:|
A|:22222222222222222222222222222222:|
D|:22222222222222222222222222222222:|
G|:444444444666666666611112222:|

```

If you don't have a mandolin, get one.

Or play these chords:

|: B | A/C# | G#m A :| Yes it's a three-bar chord sequence. :)

```

      B          A/C#          G#m  A  B
The road bends long, like a mother's arms
      A/C#          G#m  A    B
Reaching for these four black tires
      A/C#          G#m  A    B
And through the night, our knuckles tight
      A/C#          G#m  A    B
We knock off miles and yellow lines

```

|: B | A/C# | G#m A :| x2

And when it all comes in it's the biggest thing
 It's the blooming night in the white of your bright blue eyes
 And when it all goes past, it's the fastest wind
 And we make it, we make it...

|: B | A/C# | G#m A :| x2

```

      B          A/C#          G#m  A    B
And we don't look back, cause we don't need that
      A/C#          G#m          A          B
And we're going too fast, and we don't want to, don't want to crash

```

|: B | A/C# | G#m A :| x2

The road comes round, it's a curving crown
 And our tired temples try and wear it proud

Cause you get away from all you made
All the kid s mistakes you were taught to make

But we don t look back, cause we don t need that
And we re going too fast, and we don t want to, don t want to
Don t look back, cause we don t need that

A/C#

G#m

A

E

And we re going too fast, and we don t want to, don t want to crash

A

E/G# F#m E

At last we stop when the night comes on

A

E/G#

F#m

E

And i drive into you, like i m driven to do
And when we then lie still, i still feel
The road go, and them spinning wheels...

...Them spinning wheels

NC for a bit, whilst the drum kit has a little solo.

(The minutes dropping off, the miles are dropping off...)

(Obedient kids, obedient kids, look what we missed, being obedient kids...)

Mandolin riff starts in the background around here:

(We go by a million minds, we go by a million dreams, a million silent buried seeds)

(We go by a million lives, we go by a million streets, million silent buried seeds...)

(We are seeds...)

And we don t look back, cause we don t need that

And we re going too fast, and we don t want to, don t want to crash...

Don t want to crash...
