

## Red Tail Lights Hinder

You will need A Capo on the 2nd fret... This is a very easy song to play for strumming.

**Bm**                      **A**                      **G**  
You re waitin by the car as I pull in  
**D**    **A**  
And this is where the ending begins  
**Bm**                      **A**                      **G**  
Lookin like you made up your mind  
**D**    **A**  
Like anything I say would be a waste of your time  
**G**                                      **A**  
But it s too little too late  
**Bm**                      **A**  
Too bad that we can t save it  
**G**                                      **A**  
Are we really gonna leave this way?  
**Bm**                      **A**  
Give it all up and drive away?  
**D**  
Girl, I swear I was runnin around  
**A**  
Just got sick of you puttin me down  
**Bm**                      **A**  
And who died and made you queen?  
**G**  
You can t put this all on me  
**D**  
Girl, our love s on the line right now  
**A**  
Should we fight or turn around?  
**Bm**                                      **A**  
I know there s gotta be more to this thing  
**G**  
Than two hearts goin their separate ways  
Red tail lights in the pourin rain  
**D A G**  
Oh Right Now!  
**Bm**                      **A**                      **G**  
And baby, just roll that window down  
**D**    **A**  
I really wanna talk this thing out  
**Bm**                      **A**                      **G**
