

As It Should Be
Holly Williams

Hey, again it s not perfect, I just tried to figure out the chords they re playing, no what the picking is like.

AS IT SHOULD BE

F#m

Did your lover leave you stranded

C#m

Did your heart endure the truth

E

F#m

Will you fight to find the healing or will time heal all your wounds

F#m

C#m

Do you drown in your desire for a time you used to know

E

F#m

Memories cant touch you they are just a picture show

D **E** **F#m** **D** **E** **F#m**

Don t let go, oh honey cant you see

D **E** **F#m** **D**

Everything s a circle in itself

F#m

All as it should be

Have you stood inside a nightmare

Did it slap you in the face

Were you left to lose control

Did you ever find a way

Was it somebody that loved you or a face you ve never seen

So final, so quick are the hands of destiny

Don t let go, honey can t you see

Everything s a circle in itself

All as it should be

You philosophize each second then you live as if you re dead

Always aching for the beauty of the visions in your head

Was it something that you wanted only never had the guts

Now you stand ashamed and regret your giving up

Where would you be, if you had tried

If you had given all you could...

To the passion of your life

There is someone out there watching every step you take today

Every struggle, all confusion, endless questions in your head

But he s got you where he wants you

There are reasons we can t see

We all stand where we belong

Every moment meant to be

So don't let go, honey can't you see
Everything's a circle in itself
All as it should be
All as it should be
All as it should be
All as it should be

I hope there's something in these words to reveal you before everything you hide
And if you never have believed maybe you will find the willingness to try
See everything lies in its place
