Without You
Holly Williams

Bbm F# C# G# x 2

```
     Bbm              F#              C#                      G#
I m packing up to sing my songs, all these towns blend into one,
Bbm      F#           C#         G#
   I m somewhere in Madrid.
Bbm              F#                  C#                  G#
I got here on crowded trains with old guitars and a famous name,
Bbm      F#           C#         G#           Bbm     F# C# G#
   Running like a kid, I m running like a kid.
Bbm                 F#             C#                  G#
I carry  round this old backpack full of CD s and Kerouac,
Bbm      F#           C#         G#
    Living on the road.
  Bbm                    F#                  C#                  G#
I left my heart on the coast of Wales with the boy I met at The Last Hotel
Bbm        F#              C#     G#
   But I had to let him go.

   Bbm                  F#                C#             G#
And that s when I was searching, I m not searching anymore
   Bbm                  F#                C#                  G#
And that s when I was learning about the things worth living for
  Bbm         F#      C#          G#                   F#       G# (- STOP)
Before I was open, before I knew I couldn t live a day
        Bbm F# C# G#
Without you
        Bbm F# C# G#
Without you

   Bbm                           F#                  C#           G#
So I moved out west where the starlets play on the boulevards of West LA
Bbm        F#             C#       G#
   And I tried to make a name.
      Bbm            F#            C#                        G#
But it never felt like home to me so I drove three days back to Tennessee
Bbm       F#           C#       G#
   In a slow and steady rain.

  Bbm                  F#                C#             G#
And that s when I was searching, I m not searching anymore
  Bbm                   F#                C#                  G#
And that s when I was learning about the things worth living for
  Bbm         F#      C#          G#                   F#       G# (- STOP)
Before I was open, before I knew I couldn t live a day
        Bbm F# C# G#
```

```
Without you
          Bbm F# C# G#
Without you

         Bbm            F#                  C#         G#
Without you in the morning, to love me another day
         Bbm            F#                  C#                 G#
Without you in the evening, when the colors start to fade
         Bbm          F#             C#                 G#
Without you on the plane ride to hold my hand and pray
         Bbm              F#             C#              G#
Without you standing here when you could ve walked away

    Bbm             F#                  C#          G#
And now I m not searching, I m not searching anymore
   Bbm             F#                  C#                   G#
And now I m still learning about the things worth living for
    Bbm          F#        C#           G#                   F#       G# (- STOP)
I am here, I am open, and now I know I couldn t live a day
         Bbm F# C# G#
Without you
         Bbm F# C# G#
Without you

    Bbm              F#             C#                    G#
I m packing up to sing my songs, all these towns blend into one
```
