VERSE

Am
Again in the night we go into the world unknown, just let us go
I know that I m breathing slow, inhaling smoke, I just awoke
A bottle of pills I m chokin down, with dancin demons all around
And I m hearin sounds and I know I m hearin voices now
With all the buildings crashing down, it s Armageddon again
I ll drink the poison from the ground and make a toast to the end
For all the kids and all the ones and even some who ve just begun
To feel the pain Cuz they can t stand to stay away

CHORUS

Am F C
I see the streets burn every time I fall asleep
G Am
I m losing all my sanity,
F C G
I can t hide from the voice that speaks inside of me

Interlude : **Am C F G** x2

VERSE

Am
I saw you walk into a room, I saw a face I thought I knew
And all along it was true, It was me, it wasn t you
I asked myself if it s the truth a guilty conscience isn t proof
A fingerprint, well what s that do? Cause gasoline can burn that too
So hide your knives and save yourself. It s just you there s no one else
Will I change? The time will tell. Why can t I dream? What s this hell?
So maybe I should stop this time and draw the line and see the light
But it s too late, I can t this time. I ve lost my mind so say goodnight
