If I Were You
Hoobastank

most of these chords should really be played barred, although they sound ok in
root.

```
A           C#m           A           C#m
You seem to find the dark, when everything is bright
A           C#m                 C           G
You look for all that s wrong, instead of all that s right
A         C#m           A           C#m
Does it feel good to you? To rain on my parade
A         C#m             C             G
You never say a word, unless it s to complain...
C                     D
It s driving me insane

D         A             C           G     D
If I Were You, holding the world right in my hands.
D                   A             C         G         D
The first thing I d do, is thank the stars for all that I am...
                A
If I Were You
```

and so on ...
