Look At Where We Are
Hot Chip

```
           C#m7                 G#m
From the deep silence of my mind

G#m                             F#
Is something I m trying to find

            E         C#m7                          G#m
When it speaks you know you will hear my name

          C#m7               G#m
Not so complex in design

        G#m             F#
But harder to mind

          E   C#m7
As I step, in vain

              C#m7          G#m
Won t you come down to my arms

            G#m                   F#
There s something I m ready to say

            E    C#m7
Would you call, my name

              C#m7
Look at where we are

                  G#m
Remember where we started out

            F#                      G#m
Never gonna be without each others love again

              C#m7          B
Look at where we are, are, are

I need your name
```

```
          C#m7
Look at where we are

                    G#m
Remember where we started out

        F#                          G#m
Never gonna be without each others love again

              C#m7          B
Look at where we are, are, are

I need your name

C#m7, G#m, F#, G#m, C#m7, B

          C#m7                    G#m
A memory tells us that we re blessed

      G#m                 F#
But opening up this chest

    E                 C#m7
I discovered that a heart is lame

          C#m7               G#m
Falling behind what we guess

      G#m                 F#
But trying to do our best

        E             C#m7         G#m
Do we stop, do we stop in frame

              C#m7           G#m
Won t you come back to my heart

          G#m                       F#
There s something I m trying to say

              E     C#m7
Would you call, my name

                    C#m7
Look at where we are
```

```
              G#m
Remember where we started out

        F#                          G#m
Never gonna be without each others love again

              C#m7         B
Look at where we are, are, are

I need your name

              C#m7
Look at where we are
