The main riff is based on Am, F and G. I think it s played on the bass, but you can play it on a guitar like this

```

```

You just repeat that all the way through the song, while Bob Mould goes mild in Am on top of you. I don t know what Bob plays, but I doubt I d have the stamina to type it in even if I did. There is no tune. Just shout the words in as evil a voice as you can manage and then split up and form Sugar and Nova Mob instead. The words below may not match the version aswell and they change some of the words, add violins and sing in tune. It just isn t rock n roll is it kids?

(Probably composed by Grant Hart, I can t remember.)

Hey, little girl, do you need a ride?
There s room in my wagon, it s parked right outside
We can cruise down Roberts Street all night long
But I think I ll just rape you and kill you instead

I hear there s a party down at Lecove
It ll be so much easier if I drove
We could check it out, we could go and see
Come on take a ride with me

Lay down in the reeds for a while
I put all your clothes in a nice, neat, little pile
You re the cutest girl I ve ever seen in my life
But it s all over now and with my knife

PS You can also sing the words to the rave song Put your Lovin arms around me to the same backing and impress your friends.

Jez - I don t think the line there s a party at Lecove is right, Do you know what it should be?
