Human Highway

G\* - 335553

C  
There was a storm last night  
                    **Am**  
Blew away wrong and right  
                    **F**  
Watching the waves crash down  
                    **G G\* G**  
I felt myself drown

C  
Now our words like boats  
                    **Am**  
Either they sink or float  
                    **F**  
Are they designed like that  
                    **G G\* G**  
Can t they come back

Am - F - C - G

C  
Last night I was a lighthouse  
**G**  
Only needing to keep you there  
**Am**  
Like a lonesome shadow searching  
**G**                    **Am**  
Like a sea fog in the air  
                    **F**          **G**          **C**  
I ll keep you there

C  
Called on my radio  
                    **Am**  
Frequency dipped below  
                    **F**  
Audible levels  
                                    **G G\* G**  
So I sat in my wet clothes  
**C**  
Keeping the wicks trimmed and lit  
                    **Am**  
After the storm had hit  
                    **F**  
I turned on my light

**G G\* G**

But it couldn't find you
