In A Song
Hunter Hayes

capo on the first fret

G C G C

   G
The heart that I gave, the dreams that I made with someone who don t care
   C
The times that I wasted, feelings I chased, that just lead me nowhere
   G
The sleepless nights, the drag-on fights, the silence always won
   C
The tears that I cried, The breaking inside, the loneliness to come

      C   D
Well, it s alright, is this goodbye
        Em   G
It won t hurt me for too long, I ll be fine on my own
        C   D
It ll take some time, but I know that I
      Am   C   G   C
I can find where I belong, and I ll find it in a song

     G
There s songs about freedom searching for new love, how ignorance is bliss
  C
I know that I m not the only fool who s been hurt just like this
     G
Yeah, songs about making honest mistakes and heartaches I ve gone through
     C
Yeah, then I ll forgive, I won t have to forget the good things about you

   C   D
It s alright, yeah this goodbye
        Em   G
It won t hurt me for too long, I ll be fine on my own
        C   D
It ll take some time, but I know that I
      Am   C   G   C
I can find where I belong, and I ll find it in a song

Am   Em   D   C
Ooohhh, ooohhh, ooohhh,ooohhh,
    G
I m sure if I had the chance to go back, I d change more than I should,
    C
But knowing I can t is helping my chances of moving on for good,
     G

```
I m not saying there won t be too many lonely nights,
         C
But the songs that I choose getting over help me getting out alive

      C              D
It s alright this goodbye,
        Em                              G
It won t hurt me for too long, I can make it on my own
          C                         D
It ll take some time, but I know that I
            Am                         C            D
Yeah, I can find where I belong, and I ll find it in a song
                    G                   C
Yeah, I ll find it in a song, find it in a song,
G                                       C      G    C  G  C  G
I ll find myself in a song, I ll find myself in a song
```
