Only If You Told Me To
Hunter Hayes

Intro: **Em C G**

```
        G              C                    Em          G
Well I ve been searching for something true

  Em        C        G
My heart says it must be you

 G                   Em      G
I d love to fall and see it through

        Em          C        G
But only if you told me to
```

```
  G                                                    G
Well I d run through the desert, I d walk through the rain

 Em                    C                        G
Get you into trouble, and take all the blame

 G                      C          G
I d paint you a picture, write you a song

Em                     C              G
And I d do it all over if I did it all wrong
```

[Chorus]
```
                   Em              G
I don t wanna steal you away

C                                                G
Or make you change the things that you believe

                  C                      Em          G
I just wanna drink from the words you say

     C                   Em
And be everything you need

            G                      C      Em
Yeah I could be so good at loving you

        Em          C        G
But only if you told me to
```

[Same Chords as 1st verse]

I ve seen a lot of good love go to waste

And I don t wanna look back on these days

Knowing all the things you d never know

If I never said a word and let you go

[Chorus]

G   Em   C   Em

                        Em   G
I don t wanna steal you away

C   G
Or make you change the things that you believe

                    C   Em   G
I just wanna drink from the words you say

                C   Em
And be everything you need

                    G   C   Em
Yeah I could be so good at loving you

          Em   C   G
But only if you told me to

  C   Em   G
Maybe this is something I ll never be

          G   C   G
But I ll be right here till you tell me
