

Just Decide

I Fight Dragons

I was looking for chords for this song and none existed, so I spent some time figuring it out. I'm fairly new to guitar, so take the chords with a grain of salt. It sounds ok to me when I play along to the recorded version. At least it's a starting off point. All chord notation is relative fingering to the capo.

I Fight Dragons
Just Decide

My eyes see far beyond the tide

The only sure way to lose

Is being afraid to choose

So just decide

It started somewhere in my chest

I rest for daily work then work for daily rest

I left that with my clothes back on the shore
